

Written, illustrated and produced by

8,000,000 people
in the UK access
the internet from
their smartphones
every day.

94%

Have searched for local info.

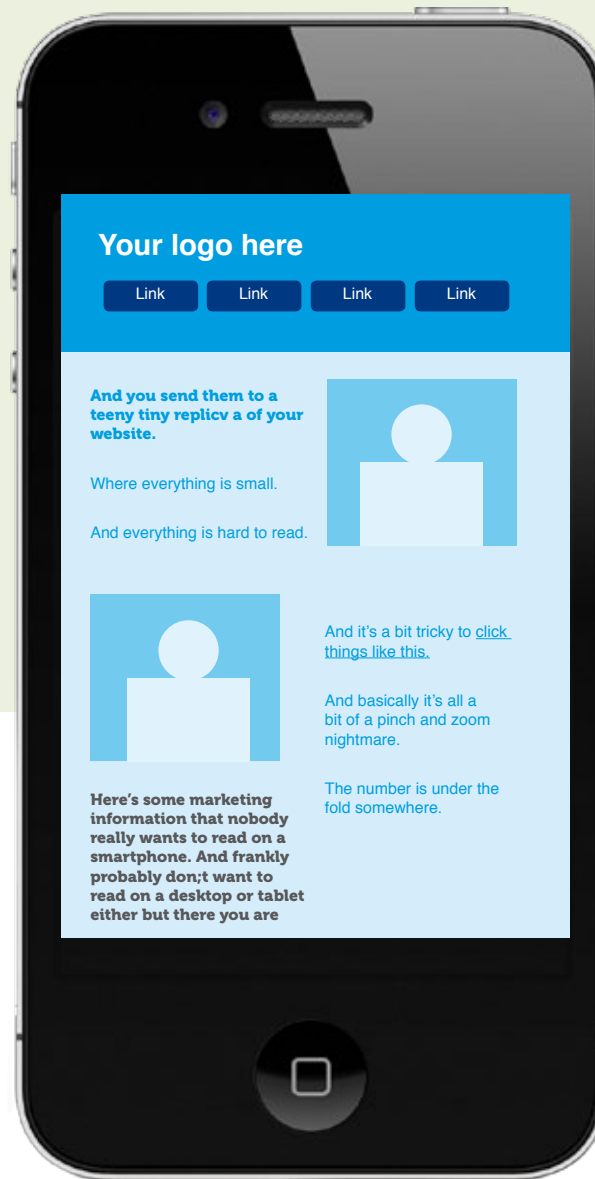

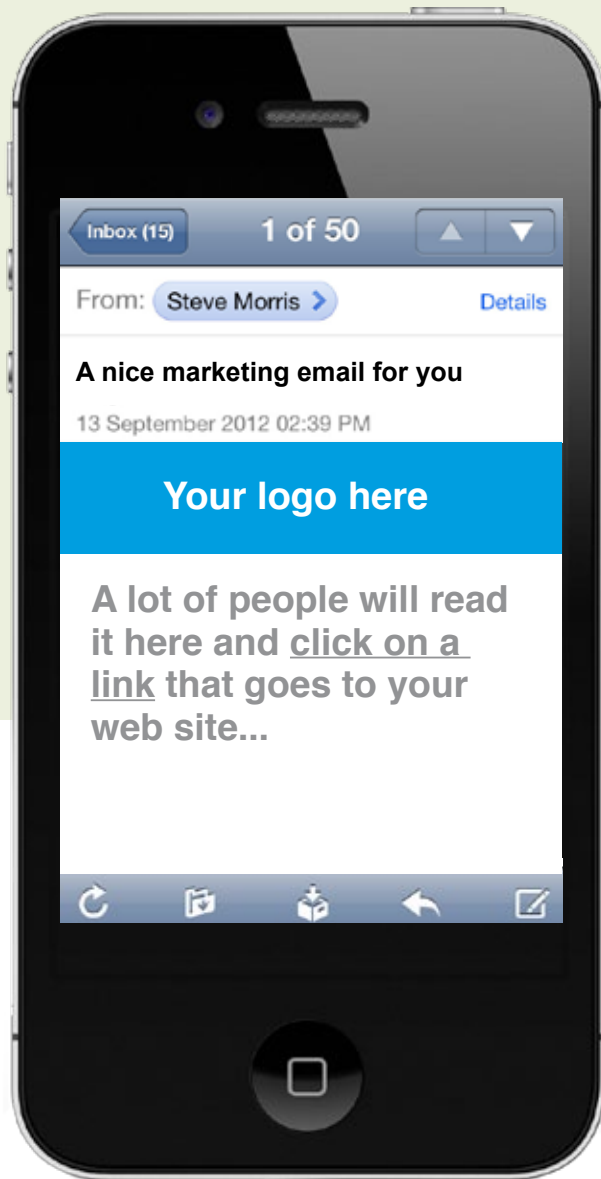

70%

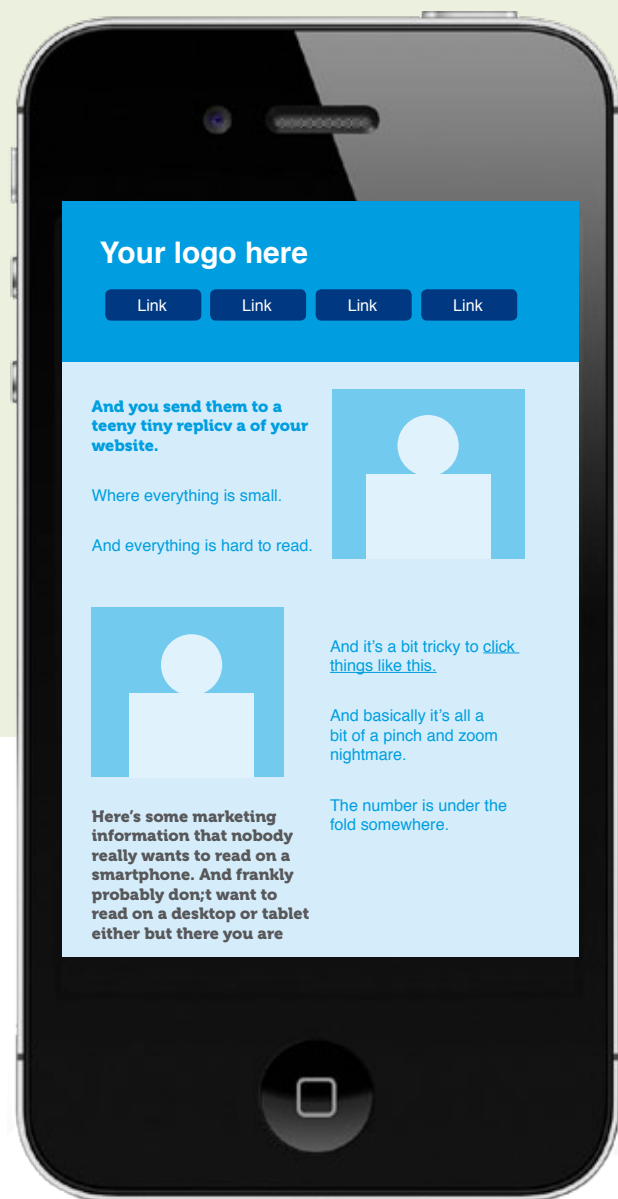

Called a local business after searching.

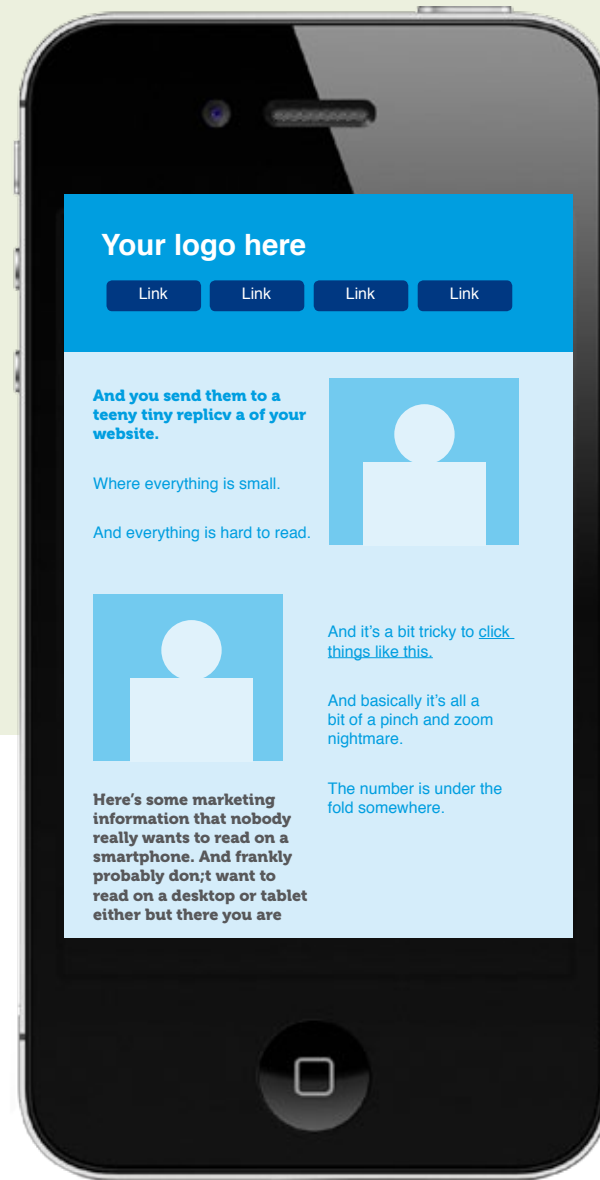

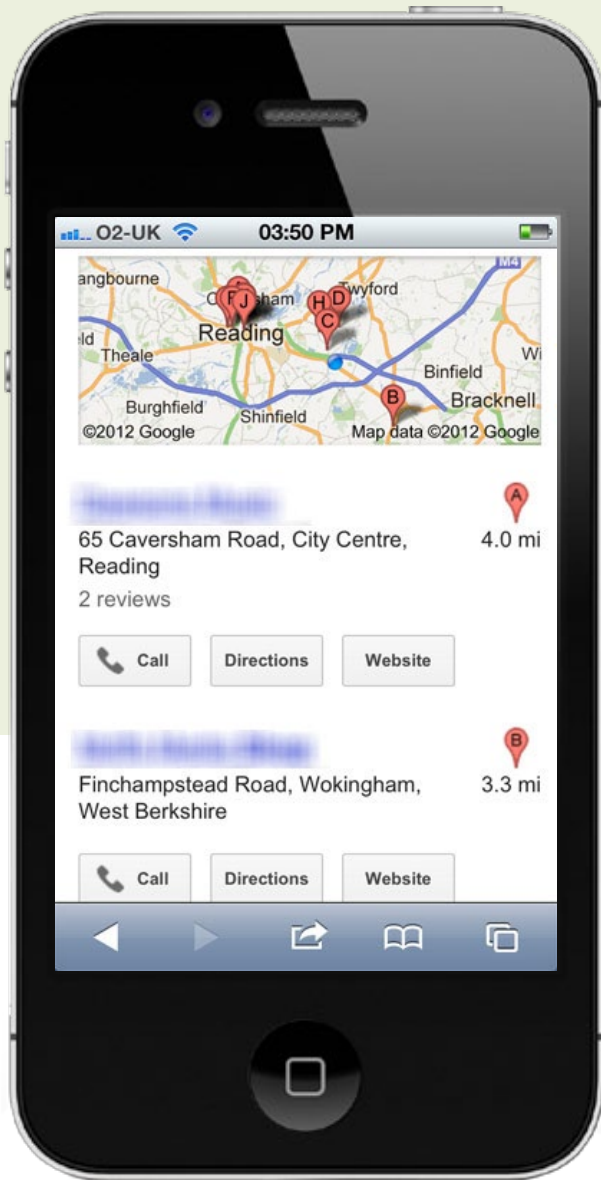

**How do people
access your web site
from a smartphone
and what kind of
experience do
they get?**

That's a bit annoying.

It's all a bit tiny.

I can't click the links.

I needed to quickly find the info I needed.

Is the stuff I really want here?

**Pinch, zoom,
...grrr...goodbye!**

57%

Say they won't recommend a business with a poorly designed mobile site.

40%

Have turned to a competitor's site after a bad mobile experience.

Context is King

Different devices means different needs & habits

Desktop users
In the office,
at a desk?

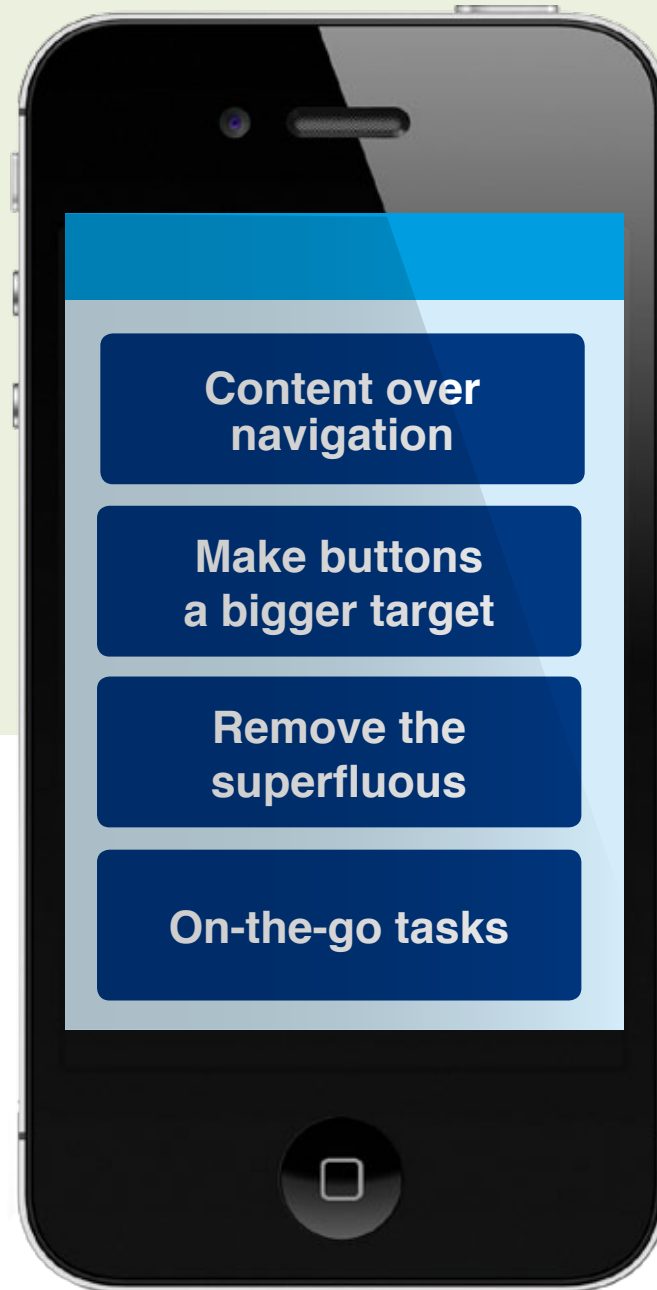

Tablet users
Relaxed, on the sofa,
after work?

Smartphone users
On the go, in
between places?

"What should we do?"

**Anticipate
users
behaviour.**

**What matters
most to them?**

“How should we do this?”

Responsive Web Design
One site for different devices

Separate Mobile Site
Dedicated site for mobile

Which way to go depends on your audience
